SECTION 1

Market Research & Demand

Niche Scoring (Pain / Money / Reach / Growth — max 40)

34	Amazon FBA EU sellers, 50–500 SKUs, expanding to Zalando ← SELECTED	9	9	8	8
		Pain	Money	Reach	Growth
33	Photography studios & e-commerce agencies (B2B)	9	9	8	7
		Pain	Money	Reach	Growth
32	European fashion brands onboarding to Zalando Partner Programme	8	8	7	9
		Pain	Money	Reach	Growth
23	Etsy / eBay sellers (avoid — lower pain & purchasing power)	5	5	7	6
		Pain	Money	Reach	Growth

The Core Problem — The Format Conflict

AMAZON SPEC

1:1 Square

2000 × 2000 px
Pure white background (RGB 255,255,255)
5% product margin

ZALANDO SPEC

2:3 Portrait

1500 × 2250 px
Light neutral background
12% product margin

KEY INSIGHT

These two formats are **structurally incompatible**. Processing for Amazon automatically makes images non-compliant for Zalando. No existing automated tool solves both specs in a single workflow — this is Centyr's unique position.

Customer Pain Map — 4 Layers

● SURFACE PAIN

- "Amazon suppresses my listings with no clear error"
- "Zalando rejected images — they want portrait"
- "200 products need reformatting for one marketplace"
- "Studio charged €4,000+ for images that got rejected"

● DEEPER PAIN

- "Every suppressed day = lost sales + wasted PPC"
- "Competitors launched on Zalando 6 months ago"
- "No scalable system — improvise every season"
- "Inventory in warehouse, can't list it"

● HIDDEN PAIN

- "My listings look amateur vs bigger brands"
- "Been promising to 'fix the photo workflow' for months"
- "Don't actually understand the technical specs"

● MIDNIGHT THOUGHTS

- "What if Amazon suppresses during Black Friday?"
- "€3,000 photoshoot, half the images rejected"
- "3 product lines 'almost done' for Zalando for 6 weeks"

- "Stuck at this revenue level forever"

Demand Assessment

URGENCY

9 /10

Listing suppression = immediate revenue loss. Zalando deadline. Seasonal launches. All three create genuine acute urgency.

WILLINGNESS TO PAY

8 /10

Already spending €6,000/cycle at studios. A €49/month subscription is invisible as a line item. Trust gap on AI quality = 8 not 10.

OVERALL DEMAND

STRONG

Buyers exist, already spending on inferior solutions, pain is recurring with calculable cost. Market is not waiting for education.

Competition Gap

COMPETITOR	WHAT THEY DO	GAP
remove.bg	Background removal only	No centering, no marketplace presets, no Zalando 2:3, one output format
PhotoRoom	Consumer/social media focus	No marketplace compliance system, no Zalando support
Canva	General design tool	Manual per-image, no batch, no compliance awareness
Pixc	Managed human service	€1.99–2.99/image, 24–48h, no multi-format simultaneous output
VA/Fiverr	Manual editing	Inconsistent quality, constant briefing, human error on specs
Centyr	AI + batch + multi-format	Automated + batch-capable + multi-marketplace-compliant + all formats simultaneously

SECTION 2

Offer Build — Catalog Passport

Offer Name: Catalog Passport by Centyr | **Category:** EU Marketplace Image Compliance Engine |
Tagline: One Upload. Every Marketplace. Zero Rejections.

Ideal Customer Avatar

An EU Amazon FBA seller managing 100–300 SKUs across Amazon.it/.de/.fr who has inventory ready for Zalando but is blocked by image rejection, has no design team, and is losing ground to competitors who are already ranking on Zalando.

Primary Avatar — Amazon FBA EU Seller

CURRENT SITUATION

- 50–500 products, new SKUs every season
- Already paid €1,500–5,000+ for studio photos
- Photos don't meet Zalando's 2:3 portrait spec
- Spending €20–50/image at studio or using inconsistent VA

FAILED ATTEMPTS

- VA/Fiverr — inconsistent, rejections with no clear reason
- remove.bg — no centering, no format, one output only
- Canva/Photoshop — requires design skills, no batch
- Studio — expensive, slow, didn't know Zalando spec

Dream Outcome

OUTCOME STATEMENT

"From 200 raw product photos stuck on your desktop to a fully compliant Amazon and Zalando catalog — in under 10 minutes, with zero design skills, no studio booking, and no risk of rejection."

PRIMARY OUTCOME

Compliant images for Amazon AND Zalando from a single upload — processed in under 10 minutes regardless of catalog size.

EMOTIONAL OUTCOME

Relief and confidence. Stop feeling blocked by a technical problem that has nothing to do with product quality.

STATUS SHIFT

From "seller with a compliance problem" to "brand that looks like it belongs on every major EU marketplace."

How It Works — 4 Steps

1

Upload Raw Photos

JPG, PNG, HEIC, TIFF, WebP.
Up to 500 images. Any background — Centyr removes it.

2

Select Presets

Amazon + Zalando pre-checked by default. eBay/Etsy with one click. Zero configuration.

3

Process Batch

BiRefNet AI removes bg on glass, jewelry, transparent packaging. Auto-centers every image.

4

Download by Platform

/Amazon and /Zalando folders. Pre-labeled. Upload directly. Nothing to sort or rename.

Marketplace Presets

PLATFORM	SIZE	ASPECT	BACKGROUND	MARGIN
Amazon	2000 × 2000 px	1:1 Square	RGB 255,255,255 (pure white)	5%
Zalando	1500 × 2250 px	2:3 Portrait	Light neutral	12%
eBay	1600 × 1600 px	1:1 Square	White	10%
Etsy	2000 × 2000 px	1:1 Square	White	8%

14 Obstacles → Solutions

OBSTACLE	SOLUTION	HOW
Doesn't know exact marketplace specs	Pre-built presets, zero config	Built-in preset selector
Amazon square vs Zalando portrait conflict	Single upload → dual output simultaneously	Multi-output batch processor
Complex products (glass, jewelry, transparent)	BiRefNet specialist AI model	Core AI engine (live)
No design skills	Zero-configuration interface	Drag → upload → download
200+ products at scale	Batch processing — upload full catalog	Bulk upload + folder download
Studio cost €20–50/image	Subscription at fraction of per-image cost	Monthly SaaS
Trust gap on AI quality	Free trial — 25 images, no credit card	Trial conversion flow
Consistency requirement	Deterministic algorithm, same spec every image	Standardized processing engine
Time pressure (inventory waiting)	Processing in minutes, not days	Async batch + email notification
Seasonal / ongoing SKU updates	Subscription credits reset monthly	Recurring subscription
Multi-format management	Organized download by marketplace	Structured output
Uncertainty about full Zalando compliance	Compliance checklist + spec docs included	Bonus stack
Emotional avoidance / backlog	First 10 images free, creates momentum	Frictionless onboarding
Language barrier (IT/DE/FR)	Localized onboarding	Multilingual UI

The Guarantee (Recommended: Option 3)

Zero-Rejection First Batch Guarantee

Process your first 25 images completely free. No credit card. No time limit.

If the output does not meet Amazon's and Zalando's exact published specifications — correct pixel dimensions, correct background color, correct margins — **you don't pay. Ever.**

Once subscribed: if any paid batch produces more than 2 images rejected for compliance reasons, we reprocess the entire batch for free — or refund you in full. Your choice.

SECTION 3

Pricing & Value Stack

ROI Anchor — Use This Before Showing Any Price

122:1

ROI Month 1

€6,000 studio ÷ €49 subscription

THE ONLY COMPARISON THAT MATTERS			
	PHOTO STUDIO	VA / FIVERR	CENTYR GROWTH
200-image catalog	€4,000–10,000	€1,600–3,000	€49/month
Turnaround	5–10 business days	24–72 hours	Under 10 min
Amazon compliance	Inconsistent	Inconsistent	Exact spec, every image
Zalando portrait	Rarely supported	Not standard	Automatic, same batch
Annual cost (2 cycles)	€8,000–20,000	€3,200–6,000	€468/year

Pricing Tiers

STARTER

€19/mo

€15/mo billed annually (€180/yr)

100 images/month

Solo sellers <50 SKUs, 1–2 catalog cycles/year

GROWTH ← MOST POPULAR

€49/mo

€39/mo billed annually (€468/yr) · Save €120

500 images/month

FBA sellers 50–500 SKUs, Amazon + Zalando expansion + full bonus stack

AGENCY

€99/mo

€79/mo billed annually (€948/yr)

2,000 images/month

Studios & agencies, 5+ client catalogs, multi-workspace, 2 team seats

Full Value Stack (Growth Tier)

Centyr EU Marketplace Compliance Engine (12-month Growth)	€708
Bonus 1: Zalando Approval Accelerator (6-checkpoint protocol)	€67
Bonus 2: Glass & Jewelry AI Unlock	€47
Bonus 3: Pre-Submission Safety Net (28-point Google Sheet)	€37
Bonus 4: Zero-Rejection Spec Vault (EU Blueprint)	€47

Bonus 5: Catalog Engine SOP Pack (Notion + Google Sheets)	€57
Bonus 6: 10-Minute Catalog Kickstart Guide	€27
Total Stacked Value	€990

Psychological Pricing Techniques

TECHNIQUE	HOW APPLIED
Price Anchoring	Always show studio cost (€6,000 / 200-image catalog) BEFORE revealing any price
Charm Pricing	€19, €49, €99 — all end in 9. Annual: €180, €468, €948 (clean round)
Annual Anchoring	"€49/month or €39/month billed annually — save €120" (amount, not %)
Tier Contrast	Each tier has a meaningfully different ceiling — Agency has multi-workspace (doesn't exist at Growth)
Free Trial as Pre-emption	25 free images → first experience of the price is AFTER they've seen compliant output

Pricing Experiments to Run

- **€49 vs. €59 A/B test** — after 50 paying subscribers. If conversion is within 10%, move to €59.
- **Annual mix target** — 30%+ annual rate. Label annual "Most Popular." Frame as "Save €120" (amount, not %).
- **Founder Rate** — first 100 subscribers at €29/month locked for life, 30-day window. Creates urgency + testimonial cohort.

SECTION 4

Bonus Stack — Objection Elimination System

STACK STRATEGY

Each bonus kills a specific objection. Order is deliberate: address entry-blocking objections first, sustainability objections last. Bonus 6 is listed last but deployed FIRST (on signup confirmation screen).

- 1

Zalando Approval Accelerator — 6-Checkpoint Image Protocol

Kills: "What if Zalando still rejects me even after Centyr?"

6 specific checkpoints responsible for 80% of Zalando Partner Programme rejections. Annotated before/after examples for each. Includes 1-page Pre-Submission Audit (5 min). Format: PDF, 15–20 pages.

€67
- 2

Glass & Jewelry AI Unlock — Expert Configuration for Complex Products

Kills: "AI won't handle my product type (glass/jewelry/transparent)"

Step-by-step config for 6 product types where every generic tool fails: glass, jewelry, transparent packaging, reflective surfaces, dark backgrounds, thin irregular edges. Includes Pre-Upload Photo Quality Checklist. Format: PDF guide + checklist.

€47
- 3

Pre-Submission Safety Net — 28-Point Compliance Gate

Kills: "What if my images still get rejected?"

Fillable Google Sheet (auto-highlights failures) + PDF version. Run before every marketplace submission. Binary pass/fail for each checkpoint. Converts pre-submit hesitation into documented "all clear." Turns subjective confidence into verifiable evidence.

€37
- 4

Zero-Rejection Spec Vault — Complete EU Marketplace Image Blueprint

Kills: "I don't understand the specs well enough to trust the output"

One reference card per marketplace. Exact pixel dimensions, RGB/HEX values, margin %, file format, max file size, naming conventions, and most common rejection reason. Includes "What Centyr outputs for this marketplace" to enable independent verification.

€47
- 5

Catalog Engine SOP Pack — Plug-and-Play Catalog Workflow System

Kills: "I need a repeatable system, not a one-time fix"

Not a guide — the BUILT system ready to copy. Notion template + Google Sheets tracker: SKU naming conventions, folder hierarchy, batch tracking, new SKU intake (target: under 2 min/SKU), seasonal refresh protocol. Eliminates post-purchase churn from "I don't know what to do next season."

€57
- 6

10-Minute Catalog Kickstart Guide ← Deployed on Signup Screen

Kills: "I don't have time to set up another tool"

7 steps, fits on one page. Account creation → first compliant image download → no documentation, no settings, no decisions. Deployed on the signup confirmation screen (not as a separate document to find). Converts "I'll do it this weekend" into "doing it right now."

€27

Effort Reduction Map — Key Friction Points Removed

JOURNEY STEP	FRICTION	FIX
Deciding to try	"Do I need a credit card?"	"No credit card required" badge on every CTA

Selecting presets	"What does 12% margin mean?"	Amazon + Zalando pre-checked by default, one-line description per preset
Reviewing output	"How do I know if this is compliant?"	In-app compliance indicator: "2000×2000 / RGB 255,255,255 / 5% margin — meets Amazon spec ✓"
Downloading	Risk of mixing Amazon/Zalando files	Auto-organized /Amazon and /Zalando folders, pre-named by SKU
Pre-submission fear	"What if something is wrong?"	Bonus 3: 28-point QA gate, documented "all clear" outcome
Trial-to-subscription	Trial user hasn't upgraded	Upgrade prompt at trial completion: studio cost comparison + one-click subscribe

SECTION 5

Objections & Rebuttals

🚫 "The AI quality won't pass marketplace review"

Hidden belief: AI produces approximate results. Amazon/Zalando enforce strict binary standards.

✅ RESPONSE:

Short: Amazon's requirements are binary. The background is either RGB 255,255,255 or it isn't. Centyr applies these values programmatically, identically, to every image. Upload your 25 hardest images free. The output answers this in 3 minutes, not in an explanation.

Proof needed: Before/after gallery (glass, jewelry) + exact spec documentation + processing volume counter.

🚫 "I already have a workflow — VA, studio, or Fiverr"

Hidden belief: switching costs are high. I've trained a VA and set up processes.

✅ RESPONSE:

Map the cost: Studio €30/image × 200 = €6,000 + 5–10 days. VA €10/image = €2,000 + inconsistencies + briefing overhead. Centyr: €49/month, under 10 minutes. Start with your next 25 images for free — run both in parallel for one cycle. You will not go back.

🚫 "It's too expensive — another subscription"

Hidden belief: I'm already paying too many SaaS tools and have tight margins.

✅ RESPONSE:

Reframe: This is NOT an additional cost — it's a direct replacement. €49/month pays for itself on the 2nd image processed against studio pricing. Annual Growth at €468 = less than one studio session for 16 images. The question isn't "can I afford €49?" It's "why am I still paying €6,000?"

🚫 "What about complex products — glass, jewelry, transparent packaging?"

Hidden belief: Generic AI tools produce poor edges on complex surfaces. My products will fail.

✅ RESPONSE:

Flip it: Glass and jewelry are the showcase for BiRefNet's advantage over every generic tool. BiRefNet uses bilateral reference-based architecture — compares high-res and low-res representations simultaneously for superior edge detection. Upload your 10 hardest products in the free trial. If glass bottles and gold jewelry come back clean, the rest of your catalog is solved.

🚫 "I don't need all four marketplaces"

Hidden belief: I'm paying for features I won't use.

✅ RESPONSE:

You only activate the presets you select per batch. Unused presets cost nothing. Every seller on Amazon alone said this before they opened Zalando. All 4 presets are included because adding them costs zero and removes the problem permanently the moment you expand. Starter at €19/month if only 1–2 marketplaces today.

🚫 "I can do it myself / my VA can handle it"

Hidden belief: This isn't as hard as you're suggesting. I have control.

✅ RESPONSE:

Consistency argument: A VA applies "white background" differently on image 1 than image 200. They eyeball the margin. Centering drifts. Amazon's algorithm catches these inconsistencies — this is WHY some images pass and some don't with no clear reason given. Centyr applies the identical specification to image 1 and image 847. 200 images × 12 minutes each = 40 hours of VA time vs. one 10-minute batch upload.

🚫 "I'll think about it / need more time"

Hidden belief: Not yet convinced enough to trust this with my catalog.

✅ RESPONSE:

The free trial exists exactly for this. You don't need to trust the claim. You need to trust your own eyes on your own images, for free. 25 images. No credit card. First result in 3 minutes. "Think about it" is exactly what the free trial is for.

Objection → Funnel Integration

OBJECTION	WHERE TO HANDLE	FORMAT
AI quality	Hero section (free trial CTA), Guarantee, FAQ	Free trial framing + before/after gallery
Already have workflow	FAQ, email days 2–4 post trial	ROI comparison calculator
Too expensive	Landing page after value stack, just before pricing	Studio cost math, annual plan framing
Complex products	Hero section before/after gallery, FAQ	Visual proof first, mechanism second, trial CTA third
"I'll think about it"	DM follow-up day 3 post-trial, email day 5	Trial reminder + conditional guarantee

SECTION 6

Positioning Angles & Value Perception

CATEGORY FIX — CRITICAL

Current wrong label: "AI-powered product photo processor" → places Centyr in the background-remover commodity category (remove.bg, PhotoRoom, Canva). New category: "EU Marketplace Image Compliance Engine" — a category Centyr currently owns alone. The category name determines the comparison set.

Top 3 Positioning Angles

RANK 1 · PAIN-BASED — STRONGEST (HIGHEST PREDICTED CONVERSION)

"Zalando rejected your images because they're square. Your Amazon catalog is already the reshoot. Upload once — get both formats in under 10 minutes."

Speaks directly to a specific, documented, recent pain event. Anyone who has received a Zalando rejection reads this and feels immediately understood. Three objection removals stacked (no hiring, no learning, no reshoot).

Best for: Hero H1, Facebook/Reddit ads, DM outreach, email subject line

RANK 2 · NICHE-SPECIFIC — STRONGEST FOR CREDIBILITY & DIFFERENTIATION

"The only tool that converts your existing Amazon image set to Zalando's 2:3 portrait spec in one automated batch — for EU FBA sellers with 50+ SKUs."

Speaks technical language (Amazon.it, Zalando Partner Programme, 2:3 portrait) that signals Centyr was built by someone who understands EU marketplace landscape. "Existing Amazon image set" removes the reshoot objection before it's raised.

Best for: Landing page headline (Zalando segment), agency pitches, community posts

RANK 3 · TIME-BASED — STRONGEST FOR URGENCY

"Turn your entire product catalog into Zalando-compliant images in under 10 minutes — the same catalog that would take a studio 5 business days and €4,000."

10-minute claim is specific enough to be credible (not "instant"), dramatic enough to contrast with current reality. Immediately activates "why am I not using this?"

Best for: Email subject lines, video ad hooks, landing page subheadline, trial activation

Bonus Naming Upgrades (Perceived Value)

OLD NAME (LEAD MAGNET FEEL)	NEW NAME (TOOL/SYSTEM FEEL)
Marketplace Spec Master Sheet	Zero-Rejection Spec Vault: Complete EU Marketplace Image Blueprint
Zalando Fast-Track Guide	Zalando Approval Accelerator: 6-Checkpoint System for First-Submission Approval
Complex Product Cheat Sheet	Glass & Jewelry AI Unlock: Expert Config for Products Every Other Tool Gets Wrong
Catalog Launch Checklist	Pre-Submission Safety Net: 28-Point Compliance Gate
Seasonal Catalog Workflow Template	Catalog Engine SOP Pack: Plug-and-Play Operational System

Feature → Outcome Rewriting

FEATURE DESCRIPTION (BEFORE)	OUTCOME DESCRIPTION (AFTER)
"BiRefNet AI removes backgrounds"	"Backgrounds removed accurately on glass, jewelry, transparent packaging — product types that trigger rejections with generic tools"
"Automatic product centering with configurable margin"	"Every product centered to the exact pixel spec — catalog looks studio-produced, not manually adjusted by a VA"
"Marketplace format presets: Amazon, Zalando, eBay, Etsy"	"Pre-built compliance presets for every major EU marketplace — no spec research, no configuration, no margin for human error"
"Dual-output processing: one upload → Amazon AND Zalando"	"The only processor that solves the Amazon-vs-Zalando format conflict. Upload Amazon photos. Get Zalando portrait files out. No second upload."
"Organized output folders by marketplace"	"Download-ready marketplace folders: Amazon images in Amazon folder, Zalando in Zalando folder — nothing to sort, misplace, or re-label"
"Free trial batch of 25 images"	"Your first 25 marketplace-compliant images, free. No credit card. No time limit. No risk. If not compliant, you don't pay. Ever."

Contrast Statements (Use in Copy)

BEFORE — FORMAT CONFLICT Amazon requires square. Zalando requires portrait. You maintain two incompatible format libraries, reprocess every image twice, every season, manually.	AFTER — FORMAT CONFLICT SOLVED One upload. Amazon-ready AND Zalando-ready files downloaded simultaneously. The format conflict no longer exists.
BEFORE — SPEED Studio booking, 5–10 business day turnaround, €4,000–10,000 invoice, some images rejected, cycle repeats next season.	AFTER — SPEED Upload raw photos. 10 minutes. Every image compliant. Every platform ready. €59/month. Next season: same 10 minutes.

SECTION 7

Top 5 Hooks — Ranked by Predicted Conversion

1

PAIN HOOK · BEST FOR: HERO H1, DM OUTREACH, FACEBOOK ADS (RETARGETING), EMAIL SUBJECT LINE

"If Zalando rejected your images because they're square: fix your entire catalog in 10 minutes without hiring anyone, learning design software, or booking another photoshoot."

2

OUTCOME + EFFORT HOOK · BEST FOR: COLD FACEBOOK/LINKEDIN ADS, ORGANIC COMMUNITY POSTS

"EU Amazon sellers: get your full product catalog compliant on Zalando in 10 minutes — without a reshoot, without a studio booking, and without touching a single image manually."

3

CONTRARIAN HOOK · BEST FOR: REDDIT, LINKEDIN (ORGANIC), EMAIL COLD OUTREACH

"Your products are not the reason your Zalando Partner Programme application failed. Your photos are square."

4

TRANSFORMATION HOOK · BEST FOR: INSTAGRAM/LINKEDIN CAROUSEL, RETARGETING, RE-ENGAGEMENT EMAIL

"From a stalled Zalando application to a compliant catalog submission — in one afternoon."

5

NICHE + COMPLEX PRODUCTS HOOK · BEST FOR: YOUTUBE PRE-ROLL, GOOGLE SEARCH ADS, "ZALANDO IMAGE REQUIREMENTS"

"EU FBA sellers expanding to Zalando: upload your existing Amazon square photos and get Zalando portrait-format images in one batch today — even if your products include glass, jewelry, or transparent packaging."

Hook Categories Quick Reference

CALLOUT HOOKS

- "EU Amazon FBA sellers expanding to Zalando: this is the one tool that resolves the square-vs-portrait format conflict."
- "If you manage 50–500 SKUs across EU marketplaces and your image workflow is costing you time, money, or delayed launches — this was built for you."

EFFORT REDUCTION HOOKS

- "Get Amazon and Zalando compliant images without Photoshop, without a VA, without a studio, and without reshooting a single product."
- "Replace 40 hours of VA editing with one 10-minute batch upload and a €49 subscription."

"HOW I" HOOKS

- "How to stop paying €6,000 per catalog cycle at the studio and switch to €49/month."
- "How to go from a Zalando image rejection to a compliant catalog submission in one afternoon."

Platform Deployment Guide

PLATFORM	BEST HOOK RANK	NOTES
Facebook/Instagram Ads	Rank 1 (retargeting), Rank 2 (cold)	Lead with Zalando rejection pain for retargeting; outcome for cold audiences
Reddit (r/FulfillmentByAmazon)	Rank 3 (contrarian)	Contrarian reads as useful observation, not ad — drives organic thread engagement

LinkedIn	Rank 2, Rank 4	Result and transformation framing; keep professional and outcome-oriented
Google Search Ads	Rank 5 (keyword-adapted)	Target: "zalando image requirements", "amazon product image format". 30-char: "Zalando Rejected Your Images?"
Email Subject Lines	Rank 3 (cold), Rank 4 (re-engagement)	Rank 3 = highest curiosity cold. Rank 4 = best for trial non-upgraders
DM Outreach	Rank 1	One sentence. Then stop and ask if it describes their situation.

SECTION 8

Pitch Scripts

1-Sentence Pitch (For bios, ads, hooks)

EU Amazon sellers with 50+ SKUs: upload your existing product photos once and download Amazon-AND Zalando-compliant images simultaneously in under 10 minutes — no reshoot, no studio, no design skills — from €49/month, first 25 images free.

60-Second Verbal Pitch (Problem → Promise → What → Why → CTA)

● PAIN

If you sell on Amazon EU and your Zalando Partner Programme application keeps getting rejected because your images are square — you are not the problem. The format is. Amazon requires 1:1 square images. Zalando requires 2:3 portrait. No studio, VA, or background removal tool fixes both in one step.

● SOLUTION

Centyr does. Upload your raw product photos once. Select your marketplace presets. Download Amazon-ready AND Zalando-ready images in the same session — in under 10 minutes. BiRefNet AI handles glass, jewelry, and transparent packaging — the product types every other tool gets wrong.

● GUARANTEE

Your first 25 images are completely free. No credit card. No time limit. See your own catalog processed to Amazon and Zalando specification before you pay anything. If the output is not compliant, you never pay. That is the guarantee.

● CTA

Go to centyr.com and run your first batch today.

Full Written Pitch (Landing Page / Email / Sales)

● CALLOUT — WHO THIS IS FOR

If you are an EU Amazon FBA seller with 50 or more SKUs — and your Zalando Partner Programme application is stalled, rejected, or sitting in your drafts because your product images are in the wrong format — this is written for you.

● PAIN — FULL STORY

You have done everything right. The products are sourced. The inventory is in the warehouse. Your Amazon listings are live. You have even paid for professional product photos — possibly several thousand euros at a studio.

And Zalando rejected the Partner Programme application. Not because of your products. Not because of your pricing. Because your images are square.

Amazon requires 1:1 square images: 2000×2000 pixels. Pure white background. 5% margin. *Those are the images in your catalog right now.*

Zalando requires 2:3 portrait images: 1500×2250 pixels. Light neutral background. 12% margin. A fundamentally different shape, different dimensions, different spec entirely.

No studio will volunteer this information when they shoot your Amazon catalog. And every week that passes is a week your competitors — who figured this out before you — are ranking on Zalando while you are not. The gap compounds. Zalando's organic algorithm weights listing age and review velocity. A competitor with a 12-week head start has 12 weeks of ranking signals you cannot buy back.

● DESIRED OUTCOME

Upload 200 raw product photos on Monday morning → Monday afternoon: 200 Amazon-compliant images AND 200 Zalando-compliant images in separate, labeled download folders → upload both folders → submit Zalando application → images are compliant → first Zalando listing live this week.

● SOLUTION — 4-STEP WORKFLOW

Step 1: Upload raw photos. Any format: JPG, PNG, HEIC, TIFF, WebP. Up to 500 at once on Growth tier.

Step 2: Select marketplace presets. Amazon + Zalando pre-checked by default. Exact spec already researched and built in — zero configuration.

Step 3: Click Process Batch. BiRefNet AI removes backgrounds on glass, jewelry, transparent packaging, reflective surfaces. Auto-centers at exact margin per preset.

Step 4: Download organized output. /Amazon: 2000×2000, RGB 255,255,255, 5% margin. /Zalando: 1500×2250, 12% margin, portrait 2:3. Nothing to sort. Upload directly.

⚡ Urgency (Real, Not Manufactured)

Every week without a compliant Zalando catalog is a week competitors accumulate listing age and review velocity — the signals that determine organic rank on a platform where early-entrant advantage is permanent and compounds over time. If your Zalando catalog would generate €2,000/month, a 4-week delay costs €2,000. That's 40× the monthly Centyr subscription. This is not a sales tactic. This is how Zalando's algorithm works.

SECTION 9

Landing Page Copy — Complete

1 Hero Section

Zalando Rejected Your Images Because They're Square.

Your existing Amazon catalog is already the reshoot. Centyr converts your square product photos into Zalando portrait format automatically — and outputs Amazon, Zalando, eBay, and Etsy compliant files simultaneously from one batch upload, in under 10 minutes. First 25 images free. No credit card.

[Process My First 25 Images Free →](#)

🛡️ **Zero-Rejection First Batch Guarantee** — if the output is not compliant, you don't pay. Ever.

✓ No credit card

✓ First result in 60 seconds

✓ No Photoshop. No design skills.

2 Problem Section

The Format Conflict That Is Costing You Zalando Revenue Every Day

You have done everything right. Products sourced. Inventory in the warehouse. Amazon listings live. Professional photoshoot paid for — possibly thousands of euros.

And Zalando rejected the Partner Programme application. **Not because of your products. Because your images are square.**

Amazon: 1:1 square, 2000×2000px, pure white, 5% margin

Zalando: 2:3 portrait, 1500×2250px, light neutral, 12% margin

These two formats are **structurally incompatible**. Processing for Amazon makes images non-compliant for Zalando. Every EU seller managing both platforms must reprocess their entire catalog twice. No existing automated tool fixes both simultaneously.

Meanwhile, every week your Zalando catalog is not live = a week competitors accumulate ranking signals that compound permanently.

3 Outcome — What "Done" Looks Like

Monday morning: upload 200 raw product photos. Monday afternoon, your downloads folder contains:

/Amazon folder — 200 images at exactly 2000×2000px, pure white (RGB 255,255,255), 5% margin, JPEG. Amazon main image spec: met exactly.

/Zalando folder — same 200 products at 1500×2250px, portrait 2:3, 12% margin. Zalando Partner Programme spec: met exactly.

Files labeled by SKU. Upload directly to Seller Central and Zalando Partner Portal. Submit application. **First Zalando listing live this week.**

And every time you add new SKUs or run a seasonal refresh — same workflow, same 10 minutes, same compliance output. Image compliance is never again the thing that delays your launches.

4 Why Centyr Works When Others Don't

Your current workflow produces some compliant images and some rejections — even with the same service, same editor, same process — because of **consistency**. A VA applies "white background" differently on image 1 than on image 200. They eyeball the margin. The centering drifts.

Centyr is a **deterministic process**, not a judgment call. RGB 255,255,255 is applied to image 1 and image 847 identically. 5% margin is not "approximately" — it is to the pixel.

BIREFNET AI — COMPLEX PRODUCTS

Most AI background removal tools fail on glass, reflective packaging, transparent materials, and jewelry (fringe artifacts, lost transparency, destroyed reflections). BiRefNet uses bilateral reference-based architecture that compares high-res and low-res representations simultaneously — specifically designed for ambiguous product/background boundaries. Glass bottles with reflections, gold chains, transparent plastic: handled.

5 Proof / Proof Section

No testimonials yet — Centyr is built for sellers who've been burned by overpromised tools. We're not asking you to trust a claim. We're asking you to test the output on your own products.

Upload your 5 most difficult products — glass bottles, jewelry, transparent packaging. Click Process Batch. 60 seconds later: see the first preview. Open /Amazon: your product centered on pure white, 2000×2000px, correct margin. Open /Zalando: same product, portrait orientation, 1500×2250px, 12% margin. **That is the proof.**

WHAT TO DO FIRST

Upload your 10 hardest products in the free trial. If BiRefNet handles those, it handles everything in your catalog. The free trial was designed for sellers with complex products because those sellers are the hardest to convince with a claim and the easiest to convince with a result on their own images.

6 Guarantee

Zero-Rejection First Batch Guarantee

Process your first 25 images completely free.

No credit card. No time limit. No watermarks or reduced quality — full processing quality, exact formats as paid subscriber.

If the output does not meet Amazon's and Zalando's exact published specifications — correct pixel dimensions, correct background color (RGB 255,255,255 for Amazon), correct margin percentages, correct portrait orientation for Zalando — **you don't pay. Ever.**

Once subscribed: if any paid batch produces more than 2 images rejected for image compliance reasons, send the rejection notice. We reprocess your entire batch at no charge — or refund in full. Your choice. **You cannot walk away with less than you arrived with.**

7 Final CTA

Your Zalando Catalog Is 10 Minutes Away From Being Submission-Ready

Every week without a compliant Zalando catalog is a week competitors who solved this first are accumulating the listing age and review velocity that determine organic position on a platform where early-entrant advantage compounds permanently. The sellers who launched 12 weeks ago have a ranking advantage today that cannot be eliminated by a better product — only by time.

Zero-Rejection Guarantee · No credit card required · First result in 60 seconds

SECTION 10

Offer Audit — Value Equation Scores

OVERALL SCORE

69/100 — Strengths: segment precision, format conflict positioning, ROI case, free trial design. Critical gaps: zero social proof, bonus stack perceived as free PDFs, no committed guarantee currently published.

DIMENSION	SCORE	KEY GAP	FIX
Dream Outcome	8/10	Outcome is specific but claim has no proof mechanism attached	Name the system: "Zero-Rejection Processing System" — give the mechanism a name
Perceived Likelihood	5/10	ZERO social proof, no pass-rate data, no before/after gallery	6–8 before/after pairs (glass, jewelry), processing volume counter, 1 real user quote
Time Delay	7/10	First win = file download, not listing going live	Post-download bridge: "Your images are ready. Here's how to upload to Amazon in 15 min."
Effort & Sacrifice	7/10	No documented onboarding sequence post-signup	In-app "do this in first 10 minutes" guided sequence (not a PDF — in-app)
Market Fit	9/10	Best-in-class segment precision	Add secondary avatar: EU fashion brand entering Zalando (32/40 score)
Offer Structure	7/10	Three guarantee options, none committed publicly	Name and commit to Option 3 publicly as primary mechanism
Value Stack	6/10	All bonuses = informational documents (low perceived value)	Upgrade 2 to execution assets: fillable Google Sheet + ready-to-use Notion template
Pricing	7/10	€29–€99 range signals internal uncertainty	Commit to 3 tiers. Public price: €59/month Growth. Annual: €49/month.
Messaging	8/10	Live hero copy ("The Right Format... Automatically") doesn't match documented strategy	Deploy Zalando rejection hook as H1 immediately — zero dev dependency, highest expected conversion impact
Objections & Trust	5/10	Guarantee, social proof, complex-product demo not visible above fold	(1) Before/after above fold (glass/jewelry). (2) Named guarantee in hero. (3) Processing volume counter on homepage.

Top 3 Priority Fixes

FIX 1 — HIGHEST IMPACT

Build the Proof Layer

Before ANY paid acquisition:

- 6–8 before/after pairs for complex products (glass, jewelry, transparent) with "Accepted on Amazon/Zalando" label

FIX 2 — HIGH IMPACT

Commit to One Guarantee

Three options = none published.
Pick Option 3:

"Zero-Rejection First Batch Guarantee"

FIX 3 — MEDIUM-HIGH IMPACT

Upgrade Bonus Stack

Documents feel free. Tools feel valuable.

- Upgrade "Catalog Launch Checklist" → fillable Google Sheet that auto-checks compliance

- Processing volume counter on homepage (even a low real number signals active use)
- First real user quote as soon as it exists
- Or: BiRefNet pass rate statistic from batch testing

Place it: (1) in hero section below CTA button, (2) at every pricing display, (3) repeated in FAQ. For paid subscribers: Option 2 (conditional compliance guarantee) as retention layer, communicated post-signup.

- Upgrade "Seasonal Workflow Template" → ready-to-use Notion/Google Sheets system
- For first 30–50 subscribers: add "Zalando Partner Programme Image Audit" (manual review by Centyr team, 20 min cost, €150+ perceived value)

Quick Wins (Zero Development Required)

- Replace live hero headline with: *"Zalando rejected your images because they're square. Your Amazon catalog is already the reshoot. Upload once — get both formats in under 10 minutes."*
 - Add "No credit card required. First 25 images free." as badge text below every CTA button
 - Name the guarantee in CTA: "Process Your First 25 Free — Zero-Rejection Guarantee"
 - Publish one complex product before/after (glass or jewelry) above the fold on homepage
 - Add a processing volume counter anywhere on the homepage
 - Add studio comparison at pricing: two-column visual — "Photo studio for 200 products: €6,000 / 5–10 days" vs. "Centyr: €59/month / 10 minutes / guaranteed compliant"
-
